HOMEWORK:

FIND A FILM/TV SERIES REVIEW (GOOD OR BAD) AND WRITE A SUMMARY:

WHO

WHERE

WHEN

WHAT

WHY

Example:

Movie Review: *The Theory of Everything*

Introduction

I recently watched a film called *The Theory of Everything*. It is a **biographical drama** directed by James Marsh. The film is set in

Cambridge, England, and it stars Eddie Redmayne and Felicity Jones. It tells the story of the famous physicist Stephen Hawking.

Plot Summary

The story begins in the 1960s when Stephen is a student at Cambridge University. He is very intelligent and has a great future. However, he soon discovers he has a serious illness called motor neurone disease. The doctors say he only has two years to live. The film focuses on his relationship with Jane Wilde and how they face the challenges of his illness together while he continues his scientific work.

My Opinion

One thing I really liked about the film was the **acting**. Eddie Redmayne is excellent; his performance is very **convincing** and moving. The **soundtrack** is also beautiful and fits the mood of the story perfectly. On the other hand, the plot is a bit slow in the middle, but it never becomes boring because you care so much about the characters.

Recommendation

Overall, I would definitely recommend this film. It is an **inspiring** and emotional story that makes you think about life and love. If you like dramas based on true stories, you will love this movie!

Wh- Question Breakdown

Question	Answer
Who?	Stephen Hawking and Jane Wilde.

Question	Answer
What?	A story of love, science, and battling a serious illness.
Where?	Cambridge University, England.
When?	Starting in the 1960s.
Why?	To show how Hawking changed science despite his disability.
